

cryo:one⁺

In the cryo:one⁺, up to two users can experience the benefits of whole-body cryotherapy at the same time. With its compact yet spacious dimensions, it has multiple fields of applications like gyms, medical facilities or wellness studios. Its powerful performance combined with a very low energy consumption makes this chamber one of the most economical innovations in the New Health sector.

- whole-body cryochamber based on the features of cryo:one
- nearly 50% additional indoor space
- even more powerful in performance
- suitable for up to 2 people simultaneously
- installed and ready for operation within shortest time

Available options:

- Recooling package
- Music package
- Cabinet housing for the engine
