

cryo:one

Our cryo:one is the smallest pure electric cryo chamber in the world. That means the customer can fit it in almost all types of practices, studios or private rooms, even on yachts. It provides the user with an exclusive cryo experience surrounded by pure air at a temperature of -85°C and with complete freedom of movement. The multi-minute treatment in the cryo:one helps revitalizing, regenerating and boosting the immune system.

- most compact whole-body cryochamber worldwide
- installed and ready for operation within shortest time
- suitable even for small rooms
- heated glass door
- low running costs

Available options:

- Recooling package
- Music package
- Cabinet housing for the engine
