

Trust the leading manufacturer

MECOTEC is a pioneer in the development of electrical refrigeration equipment and can draw on a wealth of experience over the company's 25-year history. By opting for cryochamber systems from MECOTEC, you're choosing TÜV-certified technology that sets the bar – and comes 100% from Germany.

MECOTEC is a place for specialists and team players alike. From research and development to manufacturing, sales and customer service, we work closely together towards a common goal: developing the very best ideas and offering the finest products.

With our two locations for development, production and logistics in Germany and our branches in Italy, France, the Middle East, USA and Southeast Asia, we serve the needs of our clients worldwide.

cryoair single

pure electric whole-body cryotherapy at -85°C

Effect Meets Efficiency

Opting for a **cryoair** single is a profitable decision. This cryochamber has a very small footprint and can be individually adapted by our experienced experts upon request. That makes this one-chamber solution ideal for medical practices, physiotherapy centres, spas and gyms. Its low running costs combined with its stable operating performance make it very economical. Therefore the **cryoair** single is a best-in-class product for specific applications in therapy and training.

Benefits of sub-zero temperatures

In the cryo chamber, the human body responds to a temperature of down to -85°C . This may prompt the release of endorphins, activate the immune system, boost blood circulation and metabolism, detoxify cells, and activate healing processes. Thanks to whole-body cryotherapy, you can provide an effective, non-invasive form of treatment for all sorts of applications. Your pros of cryogenic usage are for example the following:

- Enhanced fitness
- Supported rehabilitation
- Reduced muscle-sore, pain and inflammation
- Higher energy level
- Improved regeneration
- Better lymphatic drainage and blood circulation
- Fewer wrinkles and cellulite
- Less fatigue
- Less stressors

Reasons for a cryoair single

Nitrogen-free

Cooling in the **cryoair** single requires no nitrogen. This makes our technology safe, gentle and efficient.

Economical

Our innovative technology has been optimized over many years of research and is characterized by particularly low operating costs and highest reliability.

Competent

MECOTEC invented the electric cryo chamber, so you can depend on the expertise of our engineers – from planning and production in Germany to personal aftercare.

Adjustable

The **cryoair** single is perfectly suited to smaller spaces and can be adjusted to the specific conditions of your facility.

Fast and efficient

Cryotherapy takes place in next to no time and supports treatment and physical fitness.
